The screenshot shows a social media post editor interface. At the top, there's a title bar with a 'Create Post' button and a user profile icon. Below the title bar, the post title is 'AI In The Workplace: Friend Or Foe? Experts Weigh In'. The editor area is divided into three main sections: a left sidebar with a rich text editor (T, B, I, U, S, B, and icons for link, image, and list), a central content area, and a right sidebar with a preview of the post. The central content area is currently displaying a 'Generate Hooks' modal. This modal has a title 'Generate Hooks', a description 'We'll review your post content and put together a few compelling hook ideas to make it stand out. This should just take a moment.', and a list of five generated hooks, each with a copy icon. The hooks are: 'AI: Friend or foe in the workplace? (The answer is more complex than you think.)', 'The hidden cost of AI adoption... (Are we truly ready for this shift?)', 'What if AI bias goes unchecked? (It's already influencing your decisions.)', 'Breaking: AI's impact on human decisions. (From streaming to social values, see how.)', and 'AI's double-edged sword: good or scary? (Let's discuss the ethics and inclusion.)'. A 'Regenerate' button is at the bottom right of the modal. The left sidebar also shows a 'Last saved at May 21, 2025 at 12:06 pm' timestamp and a 'Tags' section with a plus icon. At the bottom, there are buttons for 'Save as Draft', 'Schedule', and 'Publish'.

AI In The Workplace: Friend Or Foe? Experts Weigh In

T B I U S B

AI: Friend or foe in the workplace?
(It's not a simple answer.)
Are we ready for AI to reshape our careers?
Virginia Tech experts weigh in on AI's impact.
AI offers improved accessibility and quality of life.
→ It helps those living with disabilities.
→ It enhances human performance.
→ It revolutionizes the built environment.
But, AI also brings potential bias from incomplete data.
→ It increases dependence on technology.
→ It has a large carbon footprint.
→ It may be used for propaganda.
AI is already influencing our decisions.
For example, streaming services use recommendation algorithms.
These algorithms influence what shows you see.

AI is already influencing our decisions.
For example, streaming services use recommendation algorithms.
These algorithms influence what shows you see.
AI systems influence human decision-making.
→ From viewing habits to purchasing decisions.
→ From political opinions to social values.
We must integrate AI into human-centered systems.
